Double-stranded cDNA was ligated to Eco RI adaptors (Pharmacia), digested with Not I and cloned into the Not I and Eco RI sites of the modified pT7T3 vector. Library is normalized, and was constructed by Bento Soares and M. Fatima Bonaldo."

This sequence encodes a novel envelope region of type C hepatitis virus (HCV). This fragment can be used for the preparation of a vaccine for hepatitis C. This fragment was prepared from the serum 5; Gaps of non-A, non-B hepatitie patients and the envelope region DNA was amplified by PCR using the primer sequences given in Q35073-76.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Claim 28; Chart 29, page 38; 71pp; English.
Compared with interferon beta prepd. by recombinant methods, the
INFs of the invention are more active and have different affinities
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      have higher therapeutic index; improved stability against microbial
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        They are also easier to recover from incubation mixts.
